

Installation Instructions for 1", 2", 4", & 6" Soft Strip LED

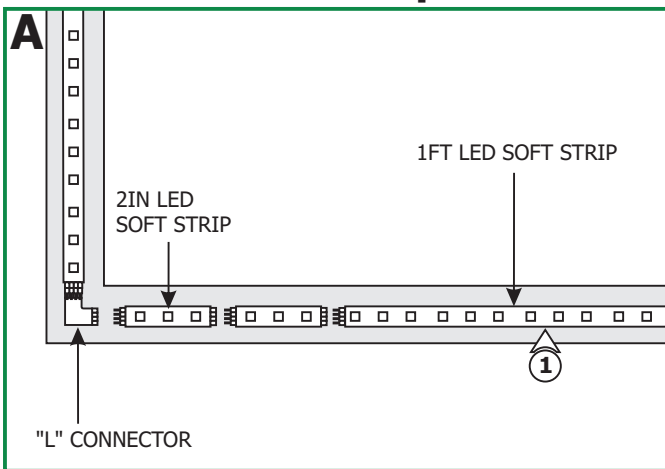

IMPORTANT INFORMATION

- This product is ETL listed for indoor locations.
- This instruction shows a typical installation for indoor.

SAVE THESE INSTRUCTIONS!

Install the Soft Strip

NOTE: The short section of soft strips can be used for fine tuning a continuous soft strip run especially when angle connectors are used for the designs that trimming the end of the soft strip is not an option.

- 1: Add the short sections of the soft stripes (as many as required) by simply connecting to the end of one soft strip run to achieve the desired design.
- 2: Follow the soft strip instructions to complete the installation

LENGTH	SOFT STRIP MODELS	SOFT STRIP TYPE
1" Soft Strip	SS2P-12V-1IN_	WW, VW
2" Soft Strip	SS2P-24V-2IN_ SS1-12V-2IN_ SS3-12V-2IN_	WW, VW WW, VW WW, VW, RGB
