

**Description:** LED power supplies transform and regulate power from a line voltage power source into low voltage power for use with LED lighting.

The PSB-100W-010-24VDC power supply accepts input voltage from 120 to 277 volts AC and outputs 24 volts DC power up to 100 watts. The low voltage output of this power supply may be dimmed down to 10% using a standard 0-10 volt dimming controller. (Supplied by other).

The black plastic enclosure provides space inside for electrical connections.
